

# Retraction: miR-940 Upregulation Suppresses Cell Proliferation and Induces Apoptosis by Targeting PKC- $\delta$ in Ovarian Cancer OVCAR3 Cells

*Oncology Research* Editorial Office

The published article titled “miR-940 Upregulation Suppresses Cell Proliferation and Induces Apoptosis by Targeting PKC- $\delta$  in Ovarian Cancer OVCAR3 Cells” has been retracted from *Oncology Research*, Vol. 25, No. 1, 2017, pp. 107–114.

DOI: 10.3727/096504016X14732772150145

Following the publication, concerns have been raised about a number of figures in this article. An unexpected area of similarity was identified in terms of the cellular data, where the results from differently performed experiments were intended to have been shown, although the areas immediately surrounding this area featured comparatively different distributions of cells. In addition, the western blots in this article were presented with atypical, unusually shaped and possibly anomalous protein bands in many cases.

The authors were contacted and invited to comment on the concerns raised and to provide the original, unmodified figures, but did not respond. The Editors-in-Chief therefore no longer have confidence in the integrity of the data in this article and decided to retract this article.

All authors have not responded to correspondence about this retraction. As a responsible publisher, we hold the reliability and integrity of our published content in high regard. We deeply regret any inconvenience caused by this situation to our readers and all concerned parties.
